Brian,

Here's the .kmz file you requested. Ed

Ed,

I noticed that the maps in the Word docs are made from Google Earth images with points added for residences.

If they are still available, could you have those points exported as .kmz files and send them to me so that I can import them into our GIS?

This would alleviate having to recreate them based on the coordinates.

Mary,

Kyle and I have completed the Excel spreadsheets that you requested; they are attached. Additionally, there is a word file that contains two pictures (data dumps from Google Earth) that shows the locations of the various residences. I will be forwarding a second Word file shortly that contains two other pictures.

If you have questions, please let me know.
