

Technology Transfer Network Clearinghouse for Inventories & Emissions Factors

[Contact Us](#) **Search:** All EPA This Area

You are here: [EPA Home](#) » [Technology Transfer Network](#) » [Clearinghouse for Inventories & Emissions Factors](#) » [Emissions Factors and Policy Applications Center](#) » [Emissions Factors & AP 42](#) » [WebFIRE](#) » Search WebFIRE

Search WebFIRE

The WebFIRE application provides fast and complete access to the Agency's air emissions factors information.

The Measurement Policy Group welcomes your comments and feedback on the WebFIRE application. We will consider comments received in future releases. Please send an email to the [Info CHIEF Help Desk at info.chief@epa.gov](mailto:info.chief@epa.gov).

Information about updates and enhancements is available on the [WebFIRE homepage](#).

SIMPLE EMISSIONS FACTOR SEARCH

[Emissions Factors Applicability](#)

[Help Information](#)

Enter your term(s) to search below and then "Submit Search." A simple search could be a SCC such as 10100101, or a phrase, such as 'concrete batching.' Don't use punctuation. For more information about Simple Search, see [the HELP Information](#).

Exclude Revoked

If you do not get results with the Simple Search, try the Detailed Search web page.

DOWNLOAD ERT TEST DATA

The Electronic Reporting Tool is a Microsoft Access® application that is an electronic alternative to the submittal of paper test plans, reports, and evaluations. The ERT allows the user to enter performance test information and data into an electronic database. This data is submitted to EPA via the [EPA CDX application, CEDRI](#). ERT data submitted to EPA is available to the public from WebFIRE using the Search ERT Submissions option.

Download WebFIRE Data

The complete WebFIRE data set is available as [Comma-separated values](#) [EXIT Disclaimer](#). The CSV file format is a very simple data file format that is supported by almost all spreadsheet software such as Microsoft Excel, as well as Microsoft Access.
