## CONTENTS

	Paragraph Number
<b>A. Introduction</b>	1
<b>B. Objectives of Radiation Protection</b>	6
<b>C. Basic Concepts</b>	15
<i>Detriment</i>	15
<i>Dose equivalent</i>	17
<i>Collective dose equivalent</i>	22
<i>Dose-equivalent commitment</i>	25
<i>Committed dose equivalent</i>	26
<b>D. Radiobiological Considerations</b>	27
<b>Dose-response relationships</b>	27
<b>Implications from assumptions about dose-response relationships</b>	31
<i>Significant volumes and areas</i>	32
<i>Rate of dose accumulation</i>	35
<b>Tissues at risk</b>	36
<i>Gonads</i>	40
<i>Red bone marrow</i>	44
<i>Bone</i>	47
<i>Lung</i>	49
<i>Pulmonary lymphoid tissue</i>	52
<i>Thyroid</i>	55
<i>Breast</i>	57
<i>Risk of cancer in all other tissues</i>	58
<i>Total stochastic risk from uniform whole body irradiation</i>	60
<i>Lens</i>	61
<i>Skin</i>	63
<i>Children and foetuses</i>	65
<i>Tissues of low sensitivity</i>	66
<i>Other effects</i>	67
<b>E. The System of Dose Limitation</b>	68
<i>The bases for deciding what is reasonably achievable in dose reduction</i>	72
<i>Dose-equivalent limits—general</i>	77

<i>Natural radiation and dose-equivalent limits</i>	87
<i>Medical exposure of patients and dose-equivalent limits</i>	91
<i>Implications for non-stochastic effects</i>	94
<i>Dose-equivalent limits for workers</i>	96
<i>Recommended dose-equivalent limits</i>	103
<i>Planned special exposures</i>	113
<i>Occupational exposure of women of reproductive capacity</i>	115
<i>Occupational exposure of pregnant women</i>	116
<i>Dose-equivalent limits for individual members of the public</i>	117
<i>Exposure of populations</i>	129
<i>Accidents and emergencies</i>	113
<b>F. General Principles of Operational Radiation Protection</b>	136
<b>Introduction</b>	136
<b>Protection standards</b>	144
<i>Limits</i>	145
<i>Reference levels</i>	149
<b>Operational optimization</b>	153
<b>G. Application to the Different Types of Exposure</b>	160
<b>Occupational exposure</b>	160
<i>Conditions of work</i>	161
<i>Provisions for restricting exposure</i>	167
<i>Monitoring of exposure</i>	173
<i>The use of protection standards to interpret monitoring results</i>	175
<i>Medical surveillance</i>	184
<i>Intervention in abnormal situations</i>	188
<b>Medical exposure</b>	195
<i>Examinations or treatments directly associated with illness</i>	197
<i>Systematic examinations</i>	200
<i>Examinations for occupational, medico-legal or insurance purposes</i>	202
<i>Medical research</i>	203
<i>The optimization of exposure</i>	205
<i>Professional training</i>	208
<b>Other exposures</b>	210
<i>The assessment of exposure</i>	212
<i>The restriction of exposure</i>	220
<i>The release of radioactive materials into the environment</i>	220
<i>Direct external exposure from sources used for industrial, medical or scientific purposes</i>	228
