

NCRP REPORT No. 160

**IONIZING RADIATION  
EXPOSURE OF THE  
POPULATION OF THE  
UNITED STATES**

**N|C|R|P|** 1929  
2009

NCRP REPORT No. 160

# **Ionizing Radiation Exposure of the Population of the United States**

**Recommendations of the  
NATIONAL COUNCIL ON RADIATION  
PROTECTION AND MEASUREMENTS**

*March 3, 2009*

National Council on Radiation Protection and Measurements  
7910 Woodmont Avenue, Suite 400 / Bethesda, MD 20814-3095

# Contents

Preface .....	iii
<b>1. Executive Summary</b> .....	1
1.1 Ubiquitous Background Exposure .....	2
1.2 Medical Exposure of Patients .....	4
1.3 Consumer Products and Activities .....	6
1.4 Industrial, Security, Medical, Educational and Research Activities .....	7
1.5 Occupational Exposure .....	9
1.6 Overall Results for 2006 .....	10
<b>2. Introduction</b> .....	14
2.1 Present Report .....	14
2.2 Radiation Source Categories .....	15
2.2.1 Ubiquitous Background Radiation .....	15
2.2.2 Patient Exposure from Medical Procedures .....	15
2.2.3 Consumer Products and Activities .....	16
2.2.4 Industrial, Security, Medical, Educational and Research Activities .....	16
2.2.5 Occupational Exposure .....	17
2.3 Principal Radiation Dose Quantities in this Report .....	17
2.3.1 Effective Dose .....	18
2.3.2 Collective Effective Dose .....	20
2.3.3 Average Effective Dose to an Individual in a Group Exposed to a Specific Source .....	21
2.3.4 Effective Dose per Individual in the U.S. Population .....	22
<b>3. Ubiquitous Background Radiation</b> .....	23
3.1 Introduction .....	23
3.2 Sources of Exposure .....	24
3.2.1 Naturally-Occurring Radionuclides .....	24
3.2.2 Anthropogenic Radionuclides .....	28
3.2.3 External Radiation .....	28
3.2.3.1 Radiation from Space .....	28
3.2.3.2 Terrestrial Radiation .....	29
3.2.4 Internal Radiation (Radionuclides in the Body) .....	30
3.2.5 Assessment of Sources of Exposure .....	30
3.3 Space Radiation .....	30
3.3.1 Calculations .....	30
3.3.2 Recent Results for U.S. Urban Areas .....	31
3.3.3 Earlier Results .....	33
3.4 Terrestrial Gamma Radiation .....	33
3.4.1 Source Terms .....	34
3.4.2 Methodology .....	35
3.4.3 Data .....	37
3.4.4 Results .....	41
3.5 Radon and Thoron and Their Short-Lived Decay Products .....	43
3.5.1 Radon Quantities and Units .....	44
3.5.2 Residential Exposure .....	45
3.5.3 Changes in Exposure to Radon and Thoron Decay Products Since 1987 .....	50
3.5.4 Exposure Characteristics of Radon and Radon Decay Products .....	51
3.5.5 Time-Use and Radon Exposure .....	52
3.5.6 Variability in the Geographic Distribution of Radon .....	53
3.5.7 Outdoor (Ambient) Radon .....	54
3.5.8 Other Indoor Exposure .....	55
3.5.9 Estimate of Population Exposure .....	55
3.5.10 Average Dose from Radon Progeny .....	56
3.5.11 Sources of Variability, Bias and Uncertainty .....	60
3.5.12 Dose from Inhaled Radon Gas .....	60
3.5.13 Thoron .....	61
3.6 Radionuclides in the Body .....	62
3.6.1 Potassium-40 .....	63
3.6.2 Thorium-232 and Uranium-238 Series .....	70
3.6.3 Radionuclides in Domestic Water Supplies .....	73
3.6.4 Cosmogenic Radionuclides .....	73
3.7 Summary and Conclusions .....	74
<b>4. Medical Exposure of Patients</b> .....	79
4.1 Introduction .....	79
4.1.1 Exposure Categories .....	80
4.1.2 Sources of Data on the Estimates of the Number of Procedures .....	81
4.1.2.1 Main Data Source .....	81
4.1.2.2 Supplementary Data .....	81
4.1.2.2.1 Medicare Physician Supplier Procedure Summary Files .....	81
4.1.2.2.2 U.S. Department of Veterans Affairs .....	82

4.1.2.2.3	Large National Employer Plan.....	82
4.1.2.2.4	Commercial Sources.....	83
4.1.2.3	Reconciling Data from Supplementary Sources with Data from IMV.....	83
4.1.2.4	Limitations in Data Availability.....	83
4.1.2.5	Projecting Estimates to 2006.....	84
4.1.3	Sources of Data for Effective Dose per Procedure.....	84
4.2	Computed Tomography.....	85
4.2.1	Effective Dose from Computed Tomography.....	86
4.2.1.1	Calculation of the Effective Dose.....	86
4.2.1.2	Typical Effective Doses in Computed Tomography.....	87
4.2.1.3	Effects of Computed Tomography Technology on Effective Dose.....	87
4.2.2	Estimating Computed Tomography Usage in the United States.....	88
4.2.2.1	IMV Benchmark Reports.....	89
4.2.2.2	Number of Computed Tomography Procedures.....	89
4.2.2.3	Number of Computed Tomography Scans.....	89
4.2.3	Collective Effective Dose Calculations.....	91
4.2.4	Sources of Uncertainty in the Dose.....	91
4.2.5	Trends in the Next Ten Years.....	96
4.3	Conventional Radiography and Fluoroscopy.....	96
4.3.1	Estimates of the Number of Procedures.....	97
4.3.2	Estimates of Effective Dose per Procedure.....	98
4.3.2.1	Nationwide Evaluation of X-Ray Trends and the Mammography Quality Standards Act.....	102
4.3.2.2	Data from State Agencies.....	102
4.3.3	Calculation of the Collective Effective Dose from Conventional Radiography and Fluoroscopy.....	103
4.3.4	Sources of Uncertainty.....	105
4.3.5	Trends Over the Next Ten Years.....	105
4.4	Interventional Fluoroscopy.....	106
4.4.1	Dose Indices and Effective Dose in Fluoroscopy.....	107
4.4.2	Estimation of the Number of Procedures and Effective Dose.....	108
4.4.2.1	Sources of Information for the Type and Number of Procedures.....	108
4.4.2.2	Sources of Information for Effective Dose.....	109
4.3	Estimation of the Mean Effective Dose to an Individual and Collective Effective Dose.....	114
4.4.4	Sources of Uncertainty in the Dose.....	116
4.4.5	Case Volume Trend in the IMV Benchmark Reports.....	116
4.4.5.1	Trend in Procedures and Patient Visits to Radiographic Fluoroscopy Rooms.....	117
4.4.5.2	Trend in Procedures in Interventional Angiography.....	117
4.4.5.3	Trend in Cases in Cardiac Catheterization Laboratories.....	117
4.5	Nuclear Medicine.....	120
4.5.1	Nuclear-Medicine Procedures.....	120
4.5.1.1	Diagnostic Examinations.....	121
4.5.1.2	Therapeutic Procedures.....	123
4.5.2	Estimate of the Annual Number of Procedures.....	125
4.5.3	Characteristics and Age Distribution of the Patient Population Exposed.....	125
4.5.4	Effective Dose, Collective Effective Dose and Effective Dose to an Individual in the U.S. Population.....	129
4.5.4.1	Discussion of the Effective Doses for the Procedures.....	129
4.5.4.2	Estimate of Collective Effective Dose and Effective Dose to an Individual in the U.S. Population.....	130
4.5.5	Uncertainties Affecting Dose Estimation.....	130
4.5.6	Discussion of Trends.....	135
4.6	Radiotherapy (External Beam).....	136
4.6.1	Applicability of Radiotherapy Exposures to this Report.....	136
4.6.1.1	Injury to Normal Tissues.....	136
4.6.1.2	Extremely-High Treatment Doses.....	137
4.6.2	Problems in Assessing Effective Doses for the Radiotherapy Population.....	137
4.6.2.1	Tissue Doses Vary Greatly.....	137
4.6.2.2	Location and Extent of Fields Vary.....	137
4.6.2.3	Neutrons.....	137
4.6.3	Possible Estimation Techniques for Collective Effective Dose.....	138
4.6.4	Current Trends in Radiotherapy Exposure.....	138
4.6.4.1	Intensity Modulated Radiotherapy.....	138
4.6.4.2	Imaging for Field Localization.....	141
4.6.5	Trends over the Next Ten Years.....	141
4.6.6	Summary.....	142

4.7	Summary and Conclusions .....	142
<b>5. Consumer Products and Activities .....</b>		
5.1	Introduction .....	147
5.2	Television Receivers and Video Terminals .....	147
5.3	Sewage Sludge and Ash .....	148
5.4	Radioluminous Products (Tritium) .....	148
5.5	Commercial Air Travel .....	153
5.6	Tobacco Products .....	155
5.6.1	Smoking Population .....	156
5.6.2	Radionuclides in Tobacco Leaves .....	156
5.6.3	Radionuclides in Tobacco Smoke .....	157
5.6.4	Inhalation .....	157
5.6.5	Deposition .....	159
5.6.6	Organ Doses .....	160
5.6.7	Effective Dose .....	160
5.6.8	Additional Impacts of Cigarette Smoking .....	162
5.7	Glass and Ceramics .....	162
5.7.1	Uranium as a Coloring Agent in Glassware .....	162
5.7.2	Potential Radiation Exposures from Uranium in Glassware .....	163
5.7.3	Uranium as a Coloring Agent in Ceramics .....	164
5.7.4	Potential Radiation Exposures from Uranium Glaze on Ceramic Dinnerware .....	165
5.7.5	Summary .....	166
5.8	Building Materials .....	166
5.9	Other Minor Contributors .....	167
5.9.1	Highway and Road Construction Materials .....	167
5.9.2	Mining and Agricultural Products .....	167
5.9.3	Combustion of Fossil Fuels .....	169
5.10	Summary .....	170
<b>6. Industrial, Security, Medical, Educational and Research Activities .....</b>		
6.1	Introduction .....	171
6.2	Nuclear-Power Generation .....	171
6.2.1	Introduction .....	172
6.2.2	Sources of Data .....	173
6.2.3	Special Considerations .....	173
6.2.4	Estimates and Discussion .....	174
6.3	U.S. Department of Energy Installations .....	177
6.3.1	Introduction .....	177
6.3.2	Sources of Data and Estimates .....	177
6.3.2.1	Estimated Doses to the Maximally-Exposed Individual .....	179
6.4	Decommissioning and Radioactive Waste .....	180
6.4.1	Introduction .....	181
6.4.2	Sources of Data .....	181
6.4.3	Special Considerations .....	181
6.4.4	Estimates of Dose .....	182
6.4.4.1	Waste Sites .....	182
6.4.4.2	Decommissioning .....	183
6.4.4.3	Technologically-Enhanced Naturally- Occurring Radioactive Material Waste Disposal .....	183
6.4.5	Comments .....	186
6.5	Industrial, Medical, Educational and Research Activities .....	186
6.5.1	Methodology and Discussion .....	186
6.5.2	Exposure to Members of the Public from Diagnostic Nuclear-Medicine Patients .....	189
6.6	Security Inspection Systems .....	189
6.6.1	Cabinet X-Ray Systems .....	190
6.6.2	Nonintrusive Inspection Equipment (Cargo Scanners) .....	190
6.6.3	Personnel Security Systems .....	192
6.7	Summary .....	193
<b>7. Occupational Exposure .....</b>		
7.1	Introduction .....	195
7.1.1	Exposure Categories and Dose Quantities .....	195
7.1.2	Limitations and Sources of Uncertainty .....	196
7.1.3	Overview of Occupational Doses .....	200
7.2	Occupational Exposures from Medical Practice .....	203
7.2.1	Summary of Personal Monitoring Information .....	204
7.2.2	Supplemental Information on Medical Specialties .....	206
7.3	Commercial Aviation .....	210
7.4	Industry and Commerce .....	217
7.4.1	General Trends .....	217
7.4.2	Naturally-Occurring Radioactive Material and Technologically-Enhanced Naturally-Occurring Radioactive Material .....	218
7.5	Commercial Nuclear-Power Industry .....	218
7.6	Academic Institutions .....	222
7.7	Government, DOE and Military .....	222
7.7.1	Government .....	227

7.7.2	U.S. Department of Energy and U.S. Department of Energy Contractors	227
7.7.3	Military	228
7.8	Summary	228
<b>8. Summary and Conclusions</b>		<b>235</b>
8.1	Population Doses for 2006	235
8.2	Comparison of Population Doses for 2006 and the Early 1980s	239
8.3	Uncertainties in Estimating the Dose Quantities	245
<b>Appendix A. Conversions from International System of Quantities and Units to Previous System</b> . . . . . 247		
<b>Appendix B. Radionuclides in Domestic Water Supplies</b> . . . . . 248		
B.1	Radium and Uranium in Drinking Water	248
B.2	Radon in Water	252
B.3	Summary	253
<b>Appendix C. Computed Tomography Dose Indices and Dose Length Product</b> . . . . . 257		
<b>Appendix D. Supporting Data for Section 4 (Medical Exposure of Patients)</b> . . . . . 260		
<b>Appendix E. Descriptions of Diagnostic and Therapeutic Nuclear-Medicine Procedures</b>		
E.1	Diagnostic Procedures	294
E.1.1	Cerebrovascular	294
E.1.2	Thyroid and Parathyroid	294
E.1.3	Cardiac	295
E.1.4	Pulmonary	295
E.1.5	Gastrointestinal	295
E.1.6	Musculoskeletal	296
E.1.7	Genitourinary System and Adrenal Glands	296
E.1.8	Inflammation and Infection Imaging	296
E.1.9	Tumor Imaging	296
E.2	Therapeutic Procedures	297
E.2.1	Thyroid	297
E.2.2	Bone Metastases Therapy	298
E.2.3	Intracavitary Therapy	298
E.2.4	Polycthemia Vera	298
E.2.5	Intra-arterial Therapy	298
E.2.6	Radioimmunotherapy	298

<b>Appendix F. Supporting Data for Section 6.3 (U.S. Department of Energy Installations)</b>		299
